## SUMMARY

Transitioning from a successful career as a small business owner in wholesale interior product distribution and interior design services, I bring over 11 years of client-facing experience, sales acumen, and project management expertise. With a proven track record of establishing new territories and managing diverse residential and commercial projects, I am adept at driving technical discussions, fostering robust client relationships, and delivering solutions that meet and exceed client expectations.

My journey into IT is supported by a Bachelor of Information Technology, which I will complete by the end of 2024, and is enhanced by multiple certifications. As a participant in the AWS AI/ML Mentor Scholarship program, I am committed to continuous learning, adaptation and passionate about leveraging technology to drive customer success through innovative and exceptional service.
